RUNWAY STATUS LIGHTS (RWSL) AT BOSTON (BOS)

RELs: Runway Entrance Lights
THLs: Takeoff Hold Lights
RILs: Runway Intersection Lights
RUNWAY STATUS LIGHTS (RWSL) OPERATIONAL CONCEPT

Runway Status Lights (RWSL) turn on and off automatically, driven by multi-sensor surveillance. RELs turn ON when it is unsafe to enter or cross a runway; RELs are visible from taxi hold position. THLs turn ON when it is unsafe to depart from a runway; THLs are visible from takeoff hold position (and final approach). RILs turn ON when it is unsafe to cross a runway intersection; RILs are visible from approximately 3500 feet prior to runway/runway intersection and may be visible from final approach.
